NURTURING THE SOCIAL ASPECTS OF THE GIFTED

Nasseroddin Kazemi Haghighi

Reviews role of the “gifted person”, “family”, “school” and “society” in “social nurturing”. In individual area, gifted characteristics (motivational, conceptual, cognitive, personality, verbal, behavioral dimensions), type of giftedness, level of intelligence, gender, development and social – economic status (S.E.S) form the essential fundamental level of his/her educability.

The gifted have special expectation from family, school and society as organs of the social nurture.

Thus the part of this three organs in gifted’s social nurturing depends on level of his/her satisfaction.

The most important gifted’s expectations will be enumerated. (Persian) PP. ۲۶۵-۲۷۷.
